Serial No.: 10/578,955 Case No.: 21575P

Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

- (currently amended) A live adenovirus formulation comprising 0.25% to 0.6% (w/v) chlorobutanol and a buffer within a pH range of about 6.0 to about 9.0.
- 2. (previously presented) A live adenovirus formulation of claim 1 wherein the formulation contains from 0.4% to 0.6% (w/v) chlorobutanol.
- (original) A live adenovirus formulation of claim 1 wherein the formulation further comprises at least one inhibitor of free radical oxidation.
- 4. (previously presented) A live adenovirus formulation of claim 3 wherein the formulation contains from 0.4% to 0.6% (w/v) chlorobutanol.
- (original) A live adenovirus formulation of claim 3 wherein the inhibitor
 of free radical oxidation is selected from the group consisting of EDTA, ethanol,
 histidine, or combinations thereof.
- 6. (previously presented) A live adenovirus formulation of claim 5 wherein the formulation contains from 0.4% to 0.6% (w/v) chlorobutanol.
- (previously presented) A live adenovirus formulation of claim 5 wherein the formulation further comprises a cryoprotectant, a salt, a divalent cation, and a nonionic detergent.
- 8. (previously presented) A live adenovirus formulation of claim 7 wherein the formulation contains from 0.4% to 0.6% (w/v) chlorobutanol.
- (original) A live adenovirus formulation of claim 1 with an adenovirus concentration in the range from about 1x10⁷ vp/mL to about 1x10¹³ vp/mL and a total osmolarity in a range from about 200 mOs/L to about 800 mOs/L.

Serial No.: 10/578,955 Case No.: 21575P

 (previously presented) A live adenovirus formulation of claim 9 wherein the formulation contains from 0.4% to 0.6% (w/v) chlorobutanol.

11-20. (canceled)

- (currently amended) A filled multi-dose vaccine vial comprising live adenovirus, 0.25% to 0.6% (w/v) chlorobutanol, and a buffer within a pH range of about 6.0 to about 9.0
- 22. (previously presented) The multi-dose vaccine vial of claim 21 wherein the formulation contains from 0.4% to 0.6% (w/v) chlorobutanol.
- (original) The multi-dose vaccine vial of claim 21 wherein the formulation further comprises at least one inhibitor of free radical oxidation.
- 24. (previously presented) The multi-dose vaccine vial of claim 23 wherein the formulation contains from 0.4% to 0.6% (w/v) chlorobutanol.
- (previously presented) The multi-dose vaccine vial of claim 23 wherein the inhibitor of free radical oxidation is selected from the group consisting of EDTA, ethanol, histidine, or combinations thereof.
- 26. (previously presented) The multi-dose vaccine vial of claim 25 wherein the formulation contains from 0.4% to 0.6% (w/v) chlorobutanol.
- (previously presented) The multi-dose vaccine vial of claim 25 wherein the formulation further comprises a cryoprotectant, a salt, a divalent cation, and a nonionic detergent.
- 28. (previously presented) The multi-dose vaccine vial of claim 27 wherein the formulation contains from 0.4% to 0.6% (w/v) chlorobutanol.
- 29. (original) The multi-dose vaccine vial of claim 21 with an adenovirus concentration in the range from about $1x10^7$ vp/mL to about $1x10^{13}$ vp/mL and a total osmolarity in a range from about 200 mOs/L to about 800 mOs/L.

Serial No.: 10/578,955 Case No.: 21575P

- 30. (previously presented) The multi-dose vaccine vial of claim 29 wherein the formulation contains from 0.4% to 0.6% (w/v) chlorobutanol.
- 31. (currently amended) A method of preserving a live adenovirus formulation which comprises adding a) chlorobutanol to the formulation to a concentration of 0.25% to 0.6% (w/v) and b) a buffer within a pH range of about 6.0 to about 9.0, such that addition of chlorobutanol maintains adequate antimicrobial effectiveness while maintaining stability of the adenovirus for at least one year when stored at 2-8°C.
- (previously presented) The method of claim 31 wherein the formulation contains from 0.4% to 0.6% (w/v) chlorobutanol.

33-36. (canceled)

- (new) The live adenovirus formulation of claim 1 wherein the buffer has a pH within a pH range of 6.4 to 7.4.
- 38. (new) The live adenovirus formulation of claim 37 wherein the formulation contains from 0.4% to 0.6% (w/v) chlorobutanol.
- (new) The multi-dose vaccine vial of claim 21 wherein the buffer has a pH within a pH range of 6.4 to 7.4.
- 40. (new) The multi-dose vaccine vial of claim 39 wherein the formulation contains from 0.4% to 0.6% (w/v) chlorobutanol.
- 41. (new) The method of claim 31 wherein the buffer has a pH within a pH range of 6.4 to 7.4.
- 42. (new) The method of claim 41 wherein the formulation contains from 0.4% to 0.6% (w/v) chlorobutanol.
